Redefining Optimum Process Control...

DRIVES & SOFTSTARTERS

Why not make life easier, right from the start?

T H I N K E L E C T R I C A L

INDEX

VARIABLE SPEED DRIVES

DANFOSS VLT® MICRO DRIVE FC 51

2

The VLT® Micro Drive FC 51 is small and yet powerful and built to last.

DANFOSS VLT® DECENTRAL DRIVE FCD 302

2

Designed for simplicity and robustness, the VLT® Decentral Drive FCD 302 is a user-friendly product with high performance and a strong protection degree.

DANFOSS VLT® HVAC DRIVE FC 102

3-4

This tough and savvy FC102 drive enhances pump and fan applications in building management systems, and runs outdoors in most mates.

DANFOSS VLT® AQUA DRIVE FC 202

4-6

Intelligence embedded in the VLT® AQUA Drive FC 202 automatically defines baseline parameters for water and wastewater applications, at all speeds and real-life operating cycles.

VACON® 20

7-8

Compact, but packed with programming functionality that's ideal for OEM applications.

VACON® 100 INDUSTRIAL

10-12

One drive for a wide range of applications. VACON® 100 INDUSTRIAL is full of features and dedicated for a wide range of constant power/ torque applications.

VACON® 100 FLOW

9, 11, 15

An AC drive that is dedicated to improving flow control and saving energy in industrial pump and fan applications.

VACON® 100 X AND VACON 20 X

12

A drive for indoor and outdoor applications that withstands high pressure and vibration levels, water, heat and dirt

VACON® NXP AIR COOLED

13-14

Designed for a broad range of demanding applications, focusing on higher power sizes and system drives.

VACON STANDALONE DRIVES

12, 15

Designed to meet the most demanding requirements and tailored to match your specific application.

FU9000D

16

FU9000D series VFD is a high performance, open loop inverter suitable for all kinds of general purpose industrial control applications.

FU9000SI

16

The FU9000SI solar pumping inverter is fully automatic, with MPPT built-in for maximum pumping efficiency.

SOFT STARTERS

AUCOM CSXI

17

Compact Low Voltage Soft Starter.

AUCOM EMX3

17

The EMX3 is a comprehensive motor management system for the most demanding soft starting and stopping applications.

AUCOM EMX4

18

The EMX4i is smaller, more powerful and packed with new control and protection features. It also introduces the game-changing Smart Card capability.

AUCOM L-SERIES

19

Medium Voltage Soft starters.

DANFOSS VLT® SOFT START CONTROLLER MCD 100

20

An extremely cost-effective and compact soft starter that provides basic soft start and stop functionality and easy DIN rail mounting.

INTEGRA ENERGY SAVING SOFT STARTERS

20

Ensuring your motors only consume the energy they require.

NEW

VLT® MICRO DRIVE

Features

- 150% Motor torque up to 1 minute
- Built-in RFI Filter
- Smart Logic Controller
- Built-in Electronic Thermal relay

Small Drive with big performance

- Less installation and operating costs
- Highly reliable due to high quality components
- 98% Energy efficiency with minimum heat losses
- Earth Fault, over temperature and short circuit protection
- RoHs environmental protection compliant

132B0102

132B0100

Micro Drive - Single Phase Input **200-240VAC**, Single phase Output **230VAC**

Code	High Overload Ratings			Frame Size	Dimensions (mm) W x H x D

Accessories

Code	Description
132B0111	DIN Rail Mounting Kit for M1 frame
132B0100	VLT® Control panel LCP 11 - without potentiometer
132B0101	VLT® Control panel LCP 12 - with potentiometer
132B0102	LCP Remote Mounting Kit with 3m cable for control panel

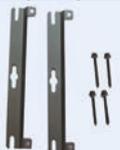

NEW

VLT DECENTRALISED DRIVE

Technical Highlights

- Built-in smart logic controller
- Built-in DC coil to limit harmonic distortion
- Very easy to install and operate

130B5772

130B5778

Decentral Drive **IP66** - Three Phase Input **380-480VAC**, Three phase Output **3 x 400VAC**

Code	High Overload Ratings			Frame Size	Dimensions (mm) W x H x D

Accessories

Code	Description
130B5771	Mounting brackets extended 40mm brackets
130B5772	Flat Mounting brackets
130B5778	Brake resistor 1750Ω 10W - Internal installations
130B5780	Brake resistor 350Ω 10W - Internal installations

One box concept minimizes design and installation cost

Unlike some decentral drives solutions, VLT® Decentral Drive **FCD 302** is a true 'One box' solutions based on the same reliable platform as the original VLT Automation Drive

Design and installation cost can be dramatically reduced. No need for field distribution or drop-down boxes and no external 24VDC supply is required.

For the OEM it's a breeze - fewer boxes to be mounted in fewer positions and fewer connections and terminations so that labour costs are significantly reduced.

This latest generation VLT® Decentral Drive **FCD 302** has been designed with simplicity and robustness in mind and offers significant advantages for multi-motor installations by mounting the drives close to the motors.

NEW

VLT HVAC DRIVE

Features

- Dedicated HVAC I/O Function for temperature sensors
- Smart Logic Controller which often makes PLC unnecessary
- No external PID controller required
- Real time clock enabling daily & weekly settings
- Automatic Energy Optimisation
- Maintenance free drive
- Extremely reliable & robust
- Enhanced advanced monitoring
- Application: Compressors, pumps, fans, building automation

HVAC Drive - Three Phase Input **380-480VAC**, Three phase Output **3 x 400VAC**

Relay and Analogue I/O Option

Code	Description	I/O
130B1110	VLT® Relay Option	3 x 3CO RELAYS 2A @ 240VAC, 1A @ 24VDC
130B1143	VLT® Analog I/O Option	3x Analog inputs: 0 ... 10V / Pt1000 / Ni1000 / 3x Analog outputs: 0 ... 10V

Application Options

Code	Description	I/O
130B1125	VLT® General Purpose I/O	3x Digital inputs Opto-decoupled 0 - 24 V. / 2x Analog inputs 0 - 10 V. / 2x Analog outputs NPN / PNP switchable 24 V / 1x Analog output 0/4 - 20 Ma
130B1172	VLT® Sensor Input Card	2 or 3 wire PT100/PT1000
130B1137	VLT® PTC Thermistor Card	1x PTB-certified PTC thermistor input / 1x Switch-off signal for the Safe Stop function - 60mA @ 24VDC 1x PNP Transistor output - 10mA @ 24VDC
130B1164	VLT® Extended Relay Card MCB 113	4x SPDT Relays = 8A @ 250VAC OR 30VDC 7x Digital Inputs = 0.24VDC PNP/NPN 2x Analog Outputs = 4-20mA
130B1108	VLT® 24V DC Supply MCB 107	24V Input voltage Max Input current 2.2A Max cable Length 75M
134B6544	VLT® Real Time Clock	The drive uses it for synchronizing real-time data.

LCP Control Panel

Code	Description	I/O
130B1124	VLT® Control Panel LCP 101	Numerical Control unit
130B1107	VLT® Control Panel LCP 102	Graphic Control unit

LCP Panel Mounting Kit for IP20 Enclosure

Code	Description	Contains
130B1113	LCP mounting kit with Graphical Control	Kit Includes Fasteners, Gasket, 130B1107 , and 3M Cable
130B1114	LCP mounting kit with Numerical Control	Kit Includes Fasteners, Gasket, 130B1124 , and 3M Cable
130B1117	LCP mounting kit 1	Kit Includes Fasteners, Gaskets, 3M cable without LCP
130B1170	LCP mounting Kit 2	Kit Includes Fasteners, Gaskets, without LCP & without Cable

LCP Panel Mounting Kit for IP55 Enclosure

Code	Description	Contains
130B1129	LCP mounting Kit 3	Kit includes fasteners, gasket, blind cover, 8M "free end cable" without LCP

VLT AQUA DRIVE

Technical Highlights

- Built-in smart logic controller making PLC unnecessary in many applications
- Reliable IP Rated Enclosures for indoor/outdoor mounting (up to IP66 on request)
- Dry run and over load pump protection
- Auto tuning of PI controllers saving time

Key Benefits

- User friendly award winning control panel (LCP)
- High energy saving efficiency (98%)
- Safe Operation and less wiring
- Broad usability in standard factory supplied enclosures

Key Benefits

- Irrigation
- Water supply
- Wastewater treatment

MOTOR CONTROL & MOTORS

VLT AQUA DRIVE

The VLT Aqua Drives are dedicated water and wastewater application drives with a wide range of powerful standard and optional features.

Features

- Cascade control
- Dry run detection
- Overload protection
- Minimum speed monitor
- Real time clock
- Alerts & warning programming

Proven Solution

VLT Aqua Drives are built on a flexible, modular design concept to provide a versatile motor control solution. It has an energy efficient design, intelligent heat management, automatic adaptation to application, energy efficient harmonic mitigation and optimal control of all motors.

Aqua Drive - Three Phase Input **525-600VAC**, Three phase Output **3 x 550VAC**

VACON® 20 COMPACT DRIVES

MI1 Frame

MI2 Frame

MI3 Frame

MI4 Frame

MI5 Frame

Features

- Push Button HMI
- EMC 4 (also suitable for IT networks)
- English quick guide
- 50Hz parameter settings

Typical applications

- Pumps and fans
- Conveyors
- Packaging, processing and washing machines

Technical highlights

- Wide power range up to 18.5 kW
- High performance and functionality
- Full I/O + option board support
- Fast installation and setup
- Built-in choke as option in ≥16A types
- Induction and permanent magnet (PM) motor support

Key benefits

- Fieldbus connectivity
- Parameter copying without main power
- Custom-made software possible

HD = Heavy Duty (3 sec Full Power + 7 sec Ramp to Zero)

LD = Light Duty (5 sec Ramp to Zero)

VACON® 100 FLOW

Application Specific Features

- Integrated DC chokes

Pumps:

- 2 PID controllers with sleep mode, soft fill, jockey pump, pump autoclean
- PM and induction motor support

Fans:

- Flying start, motor switch
- 3 prohibit frequency ranges

Benefits

- Demand-based optimization of the process for accurate process control and energy saving

Common Features

- Built-in Modbus TCP/IP and Modbus RTU
- Ethernet always included
- **Extended lifespan: last up to 300,000 hours**
- Film capacitors
- Conformal coating on PCB's
- Standard I/O + 3 free slots

VACON® 100 INDUSTRIAL

Application Specific Features

- Wide power range using only four frames
- Integrated DC chokes
- Options module for easy integration (frames MR10 and MR12)
- Safe Torque Off, Safe Stop1, ATEX-certified thermistor input
- Integrated brake chopper (optional, see page 154)
- Integrated output filters (optional)

Benefits

- Reduced installation space and costs
- Easier integration

Common Features

- Standard I/O + 3 free slots
- Built-in PLC capability
- High efficiency > 97% + energy optimization
- Built-in Modbus TCP/IP and Modbus RTU
- Ethernet always included
- **Extended lifespan: last up to 300,000 hours**

VACON 100 INDUSTRIAL - Three Phase Input **380-500V**, Three Phase Output **3 x 400V**

IP21/Type 1, Air-cooled, Wall-mounted drive, EMC Class C2, Graphical keypad

LD = Light Duty (5 sec Ramp to Zero)

MOTOR CONTROL & MOTORS

VACON® 20 X - DECENTRALIZED DRIVE IP66

Technical highlights

- 2g resistance to vibrations (according to 3M6/IEC 60721-3-3)
- Large cooling ribs
- Option of integrated mains switch

Benefits

- Cost savings from decentral concept
- Can be used in almost any environment
- Can be cleaned with pressurized water
- Custom-made software solutions with built-in PLC functionality for OEMs

VACON 20 X - Single Phase Input **208-240V**, Three Phase Output **3 x 240V IP66/Type 4X**

* 110% Overload

Technical highlights

- 3g resistance to vibrations(according to 3M7/IEC 60721-3-3)
- Option of integrated mains switch
- Integrated with RS485 Modbus and EtherNET communication
- Integrated Brake Chopper

Benefits

- Able to withstand rough conditions such as heat, dirt and vibrations
- Programming enables top class inte-gration for countless OEM applications
- Mountable in any position

VACON® 100 INDUSTRIAL - STANDALONE

The VACON 100® enclosed drives are designed to meet the most demanding requirements for flexibility, robustness, compactness and service-friendliness. They are a smart choice for many applications and available from 75 to 630 kW at 380-500 V and 75 to 800 kW at 525-690 V.

Features

- Separate cooling air channel
- Common mode and dU/dt filters integrated in cooling air channel
- Back channel cooling option available
- Fast acting aR input fuses as standard
- Integrated output filters and fuse switch as options
- Configured to order with pre-engineered options
- Door-mounted control compartment separate from the main drive
- I/O wired to standard terminal blocks
- Dedicated area for signal lights and control switches
- All components accessible from the front of the enclosure

Proven Solution

Our VACON 100® enclosed drives are compact and tested to meet harsh operating conditions. They can be installed in many different standard applications such as pumps or conveyors. The innovative air-cooling channel ensures reliable thermal handling of the enclosure and provides extended lifetime of the drive with trouble-free operation in tough environments. Approved EMC solutions ensure reliable operation of the drive without disturbing other electrical equipment.

For any enquiries regarding drives and softstarters, contact our specialized team: drives@acdc.co.za

VACON® NXP

Ideal for demanding applications. VACON® NXP range offers the ultimate in motor control, for both induction and permanent magnet (PM) motors, gearless drive applications and paralleling solutions for high power motors. VACON® NXP is the smart drive of choice. With fast fieldbus options and exceptional programming flexibility, your VACON® NXP is easily integrated into any plant's automation system. Satisfied customers also rely on our enclosed cabinet drive solution, VACON® NXC, to perform in the most challenging industrial environments such as oil and gas, extrusion, mining, pulp and paper, water and wastewater applications.

VACON NXP - Three Phase Input **380-500V**, Three Phase Output **3 x 400V IP21/Type 1**, Air-cooled, Wall-mounted, EMC Class H

VACON® NX OPTIONS

VACON NX OPTIONS - Display panels, Door installation sets, RS232 cables, Fiber optic cables

Code	Description	Suitability
PAN-A	Alphanumeric display panel	NXP
PAM-G	Graphical display panel	NXP
Door installation sets		
DRA-02B	Door installation set for display panel, 2m cable	NXP
DRA-04B	Door installation set for display panel, 4m cable	NXP
RS232 cables		
RS232C-02M	2m RS232 serial link cable, pin to pin	NXP
RS232C-04M	4m RS232 serial link cable, pin to pin	NXP
RS232-01M	1,5m RS232 PC cable	NXP
Fiber optic cables for system bus (OPT-D1, OPT-D2)		
SYS-2M	Fiber optic cable (pair), 2m	NXP
SYS-4M	Fiber optic cable (pair), 4m	NXP
SYS-10M	Fiber optic cable (pair), 10m	NXP

VACON NX OPTIONS I/O cards

Code	Description	Suitability
OPT-A1	6DI, 1DO, 2AI(mA/V), 1AO(mA/V), +10 Vref, +24V/EXT+24V	NXP
OPT-A2	2RO(NO/NC)	NXP
OPT-A3-V	1RO(NO/NC), 1RO(NO), 1Thermistor Input	NXP
OPT-A4-V	3DI(Encoder RS422), 2DI (Qualifier+Fast Input), Out +5V/+15V/+24V	NXP
OPT-A5-V	3DI(Encoder 10...24V), 2DI (Qualifier+Fast Input), Out +15V/+24V	NXP
OPT-A7	Double encoder (Wide Range), 6DI, 2DO	NXP
OPT-A8	As OPT-A1 , but analog I/O and +10Vref galv. de-coupled as a group	NXP
OPT-A9	As OPT-A1 , but 2,5 mm ² terminals (Not with AF board)	NXP
OPT-AE	Encoder board (Wide Range), 3DI(Encoder 10...24 V), Out +15V/+24V, 2DO (encoder divider and direction)	NXP
OPT-AF-V	STO SIL2/PL"d" + ATEX appr. Thermistor, all boards need to be varnished	NXP
OPT-AK-V	SIN/COS encoder interface	NXP
OPT-AL-V	6DI (42...240VAC), 2AI, 2AO, 1DO, Out 15V / 24V	NXP
OPT-AN-V	6DI (Galv. de-coupled as a group), 2AI and 2AO (Programmable 0...20mA, 4...20mA, 0...10V, 2...10V, -10...+10V)	NXP
OPT-B1-V	6DI/DO (programmable, DI or DO)	NXP
OPT-B2-V	1RO(NO/NC), 1RO(NO), Thermistor Input	NXP
OPT-B4-V	1AI(mA, isolated), 2AO(mA, isolated), +24V/EXT+24V	NXP
OPT-B5-V	3RO(NO)	NXP
OPT-B8-V	3Pt100, +24 V/EXT+24 V	NXP
OPT-B9-V	1RO(NO), 5 pcs of 41...240 VAC input	NXP
OPT-BB	ENDAT encoder card, 2xDO (RS422)	NXP
OPT-BC	RESOLVER, 3x DO (Wide Range)	NXP
OPT-BE-V	SSI and Endat Encoders	NXP
OPT-BH-V	3 x Temp sensor inputs (PT100, PT1000, KTY84-130, KTY84-150, KTY84-131, NI1000)	NXP
OPT-BL-V	Advanced safety option, requires AF board	NXP
OPT-BM-V	Advanced safety option - Pulse encoder interface, requires AF board	NXP
OPT-BN-V	Advanced safety option - SIN/COS encoder interface, requires AF board	NXP
OPT-C2	Modbus RTU / N2	NXP
OPT-C3-V	Profibus DP	NXP
OPT-C4-V	LonWorks	NXP
OPT-C5-V	Profibus DP (D9 type connector)	NXP
OPT-C6	CANopen	NXP
OPT-C7-V	DeviceNet	NXP
OPT-C8	Modbus RTU / N2 (D9 type connector)	NXP
OPT-CI-V	Modbus TCP/IP	NXP
OPT-CJ-V	BACnet MS/TP	NXP
OPT-CG-V	S2 Protocol	NXP
OPT-CP-V	ProfiNet I/O	NXP
OPT-CQ-V	Ethernet/IP	NXP
OPT-D1	System Bus adapter (2x fiber optic cable)	NXP
OPT-D2-V	System Bus (1x fiber optic cable) & CAN-BUS (Galv. Decoupled)	NXP
OPT-D3	RS232 adapter card (not galvanically decoupled)	NXP
OPT-D6-V	CAN-Bus (Galv. Decoupled)	NXP
OPT-D7	Line voltage measurement board	NXP
OPT-E9-V	2-Port Ethernet option (Modbus TCP/UDP, PROFINET, EtherNet/IP, RSTP, MRP)	NXP
OPT-EC-V	EtherCAT field bus	NXP

*Consult the Drives Team for assistance in selecting the correct rating for your application.

VACON® NXP STANDALONE

Typical applications

- Auxiliary equipment
- Pump and fans
- Main propulsion and bow thrusters
- Compressors
- Cranes and lifts

Features

- Extremely compact cabinet enclosure
- Delivered with ultra rapid AC fuses
- Optional built-in brake chopper and DC-link connectors

Benefits

- Maximize the utilization of available space while reducing the overall costs
- No need to consider any additional protection components

Hardware Configurations

- **IP21** Standard
- **IP54** (FR10 only) Optional (H: +20mm)
- Integrated ultra rapid fuses Standard
- Load switch (IEC or UL version) Optional
- EMC filtering L (EN 61800-3, category C3) Standard
- EMC filtering T (for IT -networks) Optional
- Brake chopper (optional)
- Cabling top entry H: +122 mm

VACON® 100 FLOW - STANDALONE

The VACON 100® FLOW enclosed drives are designed to meet the most demanding requirements for flexibility, robustness, compactness and service-friendliness. They are a smart choice for many applications and available from 75 to 630 kW at 380-500 V and 75 to 800 kW at 525-690 V.

Features

- Separate cooling air channel
- Common mode and dU/dt filters integrated in cooling air channel
- Back channel cooling option available
- Fast acting aR input fuses as standard
- Integrated output filters and fuse switch as options
- Configured to order with pre-engineered options
- Door-mounted control compartment separate from the main drive
- I/O wired to standard terminal blocks
- Dedicated area for signal lights and control switches
- All components accessible from the front of the enclosure

Proven Solution

Our VACON® 100 enclosed drives are compact and tested to meet harsh operating conditions. They can be installed in many different standard applications such as pumps or conveyors. The innovative air-cooling channel ensures reliable thermal handling of the enclosure and provides extended lifetime of the drive with trouble-free operation in tough environments. Approved EMC solutions ensure reliable operation of the drive without disturbing other electrical equipment.

VACON® 3000 - MEDIUM VOLTAGE DRIVE

Easy to Handle

- Compact component size with high power density
- Manageable component weight
- All components allow cabinet integration with front access only
- Easy to handle, to lift, move, and repair

Easy to Integrate

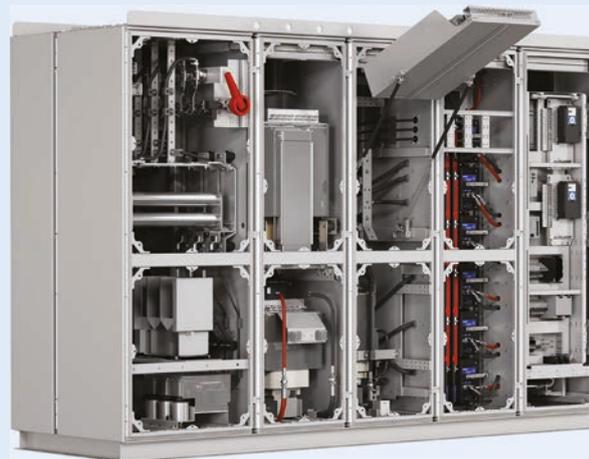

- Full harmonization, supports open solutions
- Customer-specific interface configuration of cabinet
- Customer-specific enclosure class

Robust and reliable in harsh conditions

- Designed for stability
- Long lifetime design of power modules with no cooling fans
- Rugged module enclosure provides good protection
- Reliable insulation
- Hybrid cooling of the chokes

High Performance

- High power density provides maximum power for minimal volume
- Efficient heat management using liquid-cooled power modules and hybrid-cooled chokes
- Very good speed and torque control, sensorless vector control
- AFE configurations connect to the grid without inrush current

VACON 3000
12-Pulse Diode Front End (DFE) Drivers

FU9000 DRIVES

- Open Loop
- Modbus-RTU Communication
- Automatic torque boost
- Slip Compensation
- Simplified parameters for easy start-up
- 4 Independent start-up ramps
- Flexible programmable I/O connection
- Comprehensive trip diagnostics
- Output frequency up to 500 Hz
- Built-in braking unit up to 18.5kW

General Purpose - FU9000D Series

AUCOM CSXi SOFT STARTER SERIES

CSXi Series

Control Voltage: 220V
Input Voltage: 3 Phase 200-575V

- Compact Size
- Integrated Bypass Contactors
- Essential Motor Protection
- Simple to Use
- The **CSXi** soft starter is a Constant Current / Current Ramp system, complete with current measurement and control.
- In addition to soft start and soft stop, the **CSXi** provides a range of motor protection functions, including motor overload, phase loss and excess start time.
- The **CSXi** also features a programmable relay.

AUCOM EMX3 SOFT STARTER SERIES

Control Voltage: 220V
Input Voltage: 3 Phase 380-690V

- Advanced Start & Stop Control Functions
- Full Graphical LCD Display with Real Language Text
- **IP65** Remote Mountable Keypad (Optional) (Mounting kit ordered separately)
- Integrated Bypass Contactors
- Extensive Motor Protections
- The **EMX3** is a comprehensive motor management system for the most demanding soft starting and stopping applications.
- With an impressive range of features, the **EMX3** delivers superior performance and an unprecedented level of flexibility in a compact and user-friendly package.
- The **EMX3** doesn't just start and stop your machinery with Constant Current and Current Ramp, it also features the innovative XLR-8 Adaptive Acceleration Control. XLR-8 gives you the ability to precisely manage your starting and stopping acceleration, reducing downtime and eliminating water hammer problems.

Start Here

Select a starter and diagnose issues for AuCom soft starters from the palm of your hand with the AuCom Start Here app.

Application or Industry Specific smart cards allow the EMX4 to act as a system controller, simplifying system design, installation & setup.

The **EMX4** simplifies the installation and operation of motor starting systems to reduce installation cost and time.

XLR-8 Acceleration Control

Torque or Current Control start modes influence acceleration but only XLR-8 puts you in direct control of ramp profiles and start times. Select a ramp profile and time then let the **EMX4** do the rest. XLR-8 technology auto-tunes for the connected motor and load conditions to deliver the specified performance.

EMX4 Accessories

Code	Description
PIC-RC-01	Remote Keypad Card
PIC-RC-02	Remote Keypad Card & Keypad with cable & mounting kit
PIC-RK-01	Remote Keypad, with cable & mounting kit
995-17309-00	Fingerguard Kit, 0184B ~ 0580B, IP20
SCC-PC-01	Smart Control Card Pump Application
PIC-MB-01	Modbus RTU Card,
PIC-DN-01	DeviceNet Card
PIC-PB-01	Profibus Card
PIC-MT-01	Modbus TCP Card
PIC-EI-01	Ethernet IP Card
PIC-PN-01	Profinet Card

*Consult the Drives Team for assistance in selecting the correct rating for your application.

AUCOM L-SERIES MVE SOFT STARTER SERIES

The **MVE** soft starter is a powerful and reliable solution for your medium voltage starting requirements. Extensive personal safety features, and easy-to use graphical interface, and comprehensive built-in motor/load protection make this a well balanced solution for your needs. **MVE** brings together sophisticated soft start motor control functionality in a robust yet compact physical configuration. **MVE** is available as a fully furnished cabinet, or we can retrofit **MVE** into your existing system. Turn-key **MVE** kit-type soft starters can be installed with minimal downtime. In addition to standard packages, we can supply a complete line-up to meet your requirements.

2200mm Height for easier Transportation

Available in both stand-alone and line-up configuration

IEC type tested

Safe operation with separate galvanically isolated low voltage section via IBT technology

A design based on standard components reduces the need for spare parts and simplifies support

Individually removable phase arm design allows for simple installation, service or replacement

Conformal coating on PCBs for protection in environments up to pollution degree 3

Disconnecting switch viewing window for safer de-energising (back of enclosure)

Maintenance Friendly Design

Robust hinges and handles for convenient and safe closure

Top or bottom Cable input and control wiring

Built-in locking on all compartment doors as standard

Front panel access with optional rear panel access available

Corrosion resistant hot-dip galvanized steel sheets

An ultra-compact form factor supports vertical or horizontal integration of power electronics, saving valuable space

Shorter lead times owing to a design that lends itself to more automated manufacturing processes

Optional internal power factor correction including capacitor, vacuum contactor, fuses and inrush current limiter

A range of switching options (vacuum contactor or vacuum circuit breaker)

NEW

VLT SOFT STARTER

MCD100 DIN Rail Mounted Soft Starter IP20 - Three Phase Input

Technical Highlights

- 0-10s adjustable ramp up & down time
- Adjustable initial torque up to 85%
- Auto detection of missing phase
- 24-480VAC/VDC universal control voltage
- Digitally controlled rotary switches
- secures precise settings and simplifies installations
- A universal control voltage
- (24-480VAC/VDC)- simplifies selection and keeps stock at a minimum

Code	Max Motor Power(kW)	Max Full Load Current(A)	Input Voltage	Frame Size	Dimensions (mm) W x H x D
175G4001	1,5	3	400-415VAC	S	23 x 102 x 124
175G4005	7,5	15	400-480VAC	M	45 x 110 x 128
175G4008	11	25	400-480VAC	L	90 x 110 x 128

* Maximum motor power is dependant on supply voltage

- Ratings for heavy duty as standard
- simplifies installation and reduces the risk of breakdown
- Can be used for an almost unlimited number of starts per hour without derating
- A "fit and forget" contactor design
- simplifies installation and reduces required panel space
- A robust semiconductor design
- selection can be based on motor power which ensures easy selection

INTEGRA INTELLIGENT ENERGY EFFICIENT SOFT STARTERS

For Smooth Starting

Integra is one of the finest energy saving soft-starters in the world with a wide range of adjustable features that allow you to start even the most awkward load with ease.

- Fully adjustable ramp times from 0-255 seconds
- For high inertia loads current limit will provide you with a reduced current start.

- A kick start facility will help you to get things moving on loads with high static friction.

For Energy Reduction

Integra will quietly work on your behalf to:

- Ensure that your motors only consume the energy that they require
- Significantly reduce your energy bills
- Reduce levels of unscheduled breakdowns
- Switch your motors off automatically when they are not needed
- Protect the motors from excess heat and vibration

For Soft Starting

Using Integra as a soft-starter will put you back in control by:

- Significantly increasing the life of your contactors & drive train
- Preventing dips in supply when starting larger motors components
- Allowing you to attach more equipment to a single supply
- Reducing the worrying threat of peak demand penalties when starting
- Allowing you to switch your motors on and off at any time because of reduced start current

For Controlled Stopping

Through controlled deceleration, Integra Soft Stop:

- Provides an effective solution to minimise water hammer
- Reduces the probability of damage to pipe systems
- Provides safe, cost effective plug braking

In Practice

Integra works hard on your behalf:

- Assessing the load on the motor every cycle of the supply
- Adjusting the voltage proportionately to the load
- Preventing the motor from stalling by monitoring motor flux

TECHNICAL INFORMATION

Utilization Categories IEC 947-4-1

A.C. Contactors/Relays

Category	Description & Application
AC-1	Non-Inductive/Slightly Inductive Loads - Heaters, Resistance Furnaces etc.
AC-2	Slip Ring Motors (Start/Stop/Reverse) - Wire Drawing, Stone Crushing
AC-3	Squirrel Cage Motors (Start/Stop/Reverse) - Compressors, Mixers, Conveyors
AC-4	Squirrel Cage Motors (Plugging & Inching) -Cranes, Hoists
AC5a	Switching of Electrical Discharge Lamps - Mercury Lamp, Sodium Vapour Lamp
AC5b	Switching of Incandescent Lamps - Tungsten Filament Lamp
AC6a	Switching of Transformers - Switching of LT Transformer with Load (contactor on transformer primary)
AC6b	Switching of Capacitor Banks - Switching of Capacitor Bank for PF Correction
AC7a	Slightly Inductive Load in Household Appliances and Similar Applications - Switching of Fans, Mixers, Blenders etc.
AC7b	Motor Load for Household Application - Washing Machine, Dish Washer, etc.
AC8a	Hermetic Refrigerant Compressor Motor Control with Manual Resetting of Overloads - Refrigeration
AC8b	Hermetic Refrigerant Compressor Motor Control with Automatic Resetting of Overloads - Window Air Conditioners

A.C. Switches/Isolators

Category	Description & Application
AC-12	Control of Resistive Loads and Solid State Loads with Isolation by Opto Couplers
AC-13	Control of Solid State Loads with Transformer Isolation
AC-14	Control of Small Electromagnetic Loads ($\leq 72VA$)
AC-15	Control of Electromagnetic Loads ($>72VA$)
AC-20	Connecting and disconnecting under no-load conditions
AC-21	Switching of resistive loads including moderate overloads
AC-22	Switching of mixed resistive and inductive loads including moderate overloads
AC-23	Switching of motor loads or other highly inductive loads

D.C. Contactors/Relays

Category	Description & Application
DC-1	Non-Inductive/Slightly Inductive Loads - Heaters, Resistance Furnaces
DC-3	Shunt Motors (Starting, Plugging & Inching) Dynamic breaking of DC Motors - Shunt Motors, Textile Ind., Steel Ind.
DC-5	Series Motor (Starting, Plugging & Inching) Dynamic Breaking of DC Motors - Series Motor Used in EMU's, Lifts, Hoists
DC-6	Incandescent Lamps - Light used In Railways Coaches

D.C. Switches/Isolators

Category	Description & Application
DC-12	Control of Resistive Loads and Solid State Loads with Isolation by Opto Couplers
DC-13	Control of DC Electromagnets
DC-14	Control of Electromagnetic Loads Having Economy Resistors in Circuit
DC-20	Connecting and disconnecting under no-load conditions
DC-21	Switching of resistive loads including moderate overloads
DC-22	Switching of mixed resistive and inductive loads including moderate overloads
DC-23	Switching of motor loads or other highly inductive loads

IP Rating for Enclosures – IEC 529

FIRST CHARACTERISTIC NUMERAL:

Protection against ingress of solid foreign objects and against access to dangerous parts

Meaning	0	1	2	3	4	5	6
Protection against ingress of:	No Protection	Solid objects larger than \varnothing 50mm	Solid objects larger than \varnothing 12,5mm	Solid objects larger than \varnothing 2,5mm	Solid objects larger than \varnothing 1mm	Dust in a harmful quantity	Dust (total protection)
Personal protection against access with:	No Protection	Back of hand	Finger	Tool		Wire	

SECOND CHARACTERISTIC NUMERAL:

Protection against water

Meaning	0	1	2	3	4	5	6	7	8	9
Protection against effect of:	No Protection	Vertically falling drops of water	Vertically falling drops of water with maximum inclination of 15°	Rain	Splashing water	Water jet	Powerful water jet	Temporary immersion	Continuous immersion	Powerful hot water jet

Example

Protection against ingress of dust in a harmful quantity

IP

5

4

Protected against effects of splashing water
